Supersedes AFI 36-2226/PACAF1, 10 April 1998

Certified by: HQ PACAF/SFX
(Lt Col Michael R. Moreland)
Pages: 7
Distribution: F

This publication applies to the Air National Guard upon mobilization and when published in ANGIND 2. This supplement does not apply to US Air Force Reserve units.

SUMMARY OF REVISIONS

This supplement eliminates simulator use as a means to qualify active duty forces, revises Combat Arms Program Measurement Requirements, allows for 10 Meter firing on initial M60, and M249, allows personnel serving a short tour in PACAF to zero their rifles, defines when to report no shows and mandates that the NCOIC CATM is responsible for all SF Armories.

AFI 36-2226, 1 March 2000, is supplemented as follows.

1.13.8.1. Ensures combat arms will remain open to conduct training during contingency exercises unless installation commander or designate terminates combat arms training.

1.14.2.1. NCOIC CATM is responsible for all Security Forces armory operations.

1.14.6.1. Weapons maintenance evaluations must be conducted annually for all Combat Arms personnel, (SEI 312 and B shreds) who perform CATM or Armory duties. NCOIC CATM will develop a tracking system to ensure the same individual is not evaluated on the same weapon each year.

1.14.14.1. NCOIC CATM will report all no shows. This will be accomplished by sending a monthly no show letter through the SF Commander to the respective unit Commanders.

1.14.14.2. An Individual is considered a no show if a unit fails to notify combat arms at least 24 hours prior to scheduled training. Bona fide emergencies and operational necessities verified by unit are not considered no shows.

1.14.23.1. Combat Arms sections will maintain applicable portions of updated copies of host tenant agreements for organizations/units requiring Combat Arms Support.

2.1.3.1. Unless directed by other regulatory sources, officers assigned mobility positions will train on handgun and enlisted will train on rifle. Combat Arms training applies to personnel assigned mobility positions destined for deployment outside the CONUS. Nonessential qualification is prohibited.

2.4.1.1. The inability to conduct full distance training must be coordinated with PACAF/SFXT (MAJ-COM Combat Arms Functional Manager).

2.4.1.2. Live-fire weapons qualifications will be conducted for all arming groups within PACAF.

2.8.4.1. Group A and B personnel serving a short tour within PACAF who qualified with the appropriate weapons within 90 days of departure from previous base are qualified for the duration of their short tour. Personnel who extend existing tour more than 90 days or enter into a consecutive overseas tour must requalify NLT 90 days beyond original DEROS.

2.8.4.2. 3PXXX Personnel serving a short tour within PACAF will zero their assigned M16A2 with 10 rounds prior to being released from training. This only applies if ranges are operational and ammunition permits.

3.5.1. Instructors who are lead instructor certified or who qualify strictly to maintain instructional skills are not required to participate in the 6 month recurring training (classroom only) sessions for the M249, M60, M2, MK19, and M29.

5.2.2.1. Combat Arms Program Report parts I and II are due annually to HQ PACAF/SFXT by 15 Oct of each year. Part III is due semi annually to HQ PACAF/SFXT by 15 Apr, and 15 Oct of each year.

6.5.4. Combat Arms personnel will accomplish the inspection of In-Use weapons semiannually. Semiannual weapon inspections will be conducted at 5 to 7 month intervals.

6.5.5.1. Weapons not in use will not be removed from extended storage for exercises. A copy of the original AFTO Form 105 will be placed in a weather resistant bag inside the shipping/storage container for deployments. The original AFTO Form 105 will accompany weapon when weapon is permanently transferred to another organization. Owning organization will attach a serialized weapon's list to outside of shipping/storage container.

6.5.6.1. Pre-embarkation Inspections (PI) will not be conducted for home station training exercises; however, Combat Arms personnel will demonstrate this capability during an IRRI. PACAF/IG will determine percent/quantity of weapons to be inspected.

6.5.7.1. Units are required to notify the Combat Arms section of the return of the deployed weapons within 10 calendar days.

Attachment 1

RCS: HAF-SF (A & SA) 9371, COMBAT ARMS PROGRAM REPORT

HQ USAF/SFW uses reported Combat Arms information to monitor status of weapons, ammunition and facilities. This information is used to assist in forecasting efforts to obtain ammunition, and modernize weapons/equipment programs. Range facility data is gathered to justify the need for continuous Combat Arms facility improvement. Discontinue reporting during emergency conditions. Do not send by message if MINIMIZE is in effect. Use the following as a suggested format. In addition to these items, add site specific information as appropriate. **Parts I and II are due to HQ PACAF/SFXT by 15 Oct each year and part III is due 15 Apr and 15 Oct of each year.**

Part I
COMBAT ARMS FACILITIES
HAF-SF (A & SA) 9371

BASE:**MAJCOM:**

Range Description:	Backstop	Firing Points	Supporting Data
Rifle/Handgun/Shotgun (Outdoor baffled, dirt side berms with grass floor)	Steel Bullet Trap	21	Work order submitted to remove ground baffles
M60 (Tube)	Dirt	3	New Facility (opened 10 Sep 98)
M203 GL (Impact)	N/A	6	Army Guard Facility 45 miles (one way) from base

SUPPORT FACILITY INFORMATION: Include age of facility, student capacity, armory, and maintenance/cleaning room availability. Also include descriptions of open work orders, real property category, condition codes, and projects in the facility investment metric (if any). Provide the amount of money spent on range or facility renovation/self help/construction during the reporting period.

Part II
